SENIOR FRONTEND DEVELOPER

Senior Fullstack Developer with **10+ years of solid experience** building **scalable, high-performance web applications** with a strong focus on **ReactJS, component-driven architecture, and design systems**. Proven track record delivering **enterprise-grade platforms**, replacing legacy systems, and building **reusable UI frameworks** used across multiple products.

Highly experienced in **modern JavaScript (ES6+), ReactJS, TypeScript, NodeJS, Express, Tailwind CSS**, and frontend performance optimization. Known for **clean architecture, accessibility-aware components, mentoring developers**, and collaborating closely with designers, backend engineers, and stakeholders.

TECHNICAL SKILLS

Frontend: ReactJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, ShadCN, Bootstrap

State Management: Redux, MobX, Zustand

Frameworks / Platforms: Next.js, [Node.js](https://nodejs.org/), Express

Styling & UI: Design Systems, Component Libraries, Styled Components, Responsive Design, Cross-Browser Compatibility

Tooling: ESLint, Prettier, Vite, REST APIs, Figma, Canva, Adobe XD, AI

Other: Performance Optimization, Accessibility (a11y), Agile / Scrum, Code Reviews, Mentorship

Backend / Other Exposure: Ruby on Rails, Java, .NET, Python, SQL, API, WordPress, Automation, Scripting

EXPERIENCE

Senior Frontend Developer

Dentsu Myco Services, Inc. (July 2022 - May 2026)

- Developed and maintained **React-based component libraries and design system components** integrated with Drupal, improving UI consistency and developer productivity
- Built **reusable, accessible UI components** used across multiple enterprise web packages
- Optimized frontend performance, scalability, and maintainability for production applications
- Collaborated closely with designers, backend engineers, and stakeholders across multiple teams
- Participated in **code reviews, release cycles, and architectural discussions** with senior developers and team leads

Current Project: jp.iqos.com

Tech Stack: ReactJS, Drupal, C#, REST APIs, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Senior Frontend Developer

Peplink (Hong Kong) (May 2018 - June 2022)

- Led frontend development for **10+ internal and external production applications** using **React and Next.js**

- Designed and built **reusable component libraries and shared frontend utilities**, improving development speed and cross-team consistency
- Architected and delivered enterprise platforms including community systems, e-commerce applications, logistics tools, CRM replacements, and ticketing systems
- Developed a **custom WYSIWYG editor** with advanced rich-text functionality for a large-scale community platform
- Replaced Salesforce with a **custom-built enterprise solution**, leading frontend architecture and implementation
- Built responsive dashboards and management portals using **React and Material UI**
- Mentored **4 junior frontend developers**, improving onboarding efficiency, code quality, and adherence to React best practices
- Partnered closely with UX designers and backend engineers to ensure **technical feasibility, pixel-perfect UI, and scalable architecture**
- Optimized applications for **performance, scalability, maintainability, and long-term product growth**

Frontend Developer

Recruit.net (Hong Kong) (March 2017 - 2018)

- Refactored and modernized legacy frontend codebases
- Improved responsiveness, performance, and maintainability of a large-scale job search platform

Frontend Developer

Brydge Pte Ltd (Singapore) (March 2016 - December 2016)

- Solely responsible for frontend development of a professional social networking platform
- Delivered a fully responsive UI using EmberJS

Frontend Developer

Favorite Medium (Singapore) (October 2011 - March 2016)

- Developed responsive, production-ready web applications using **AngularJS, JavaScript, HTML5, CSS3, SCSS, jQuery, Rails, and NodeJS**
- Converted complex PSD designs into **pixel-perfect, cross-browser compatible interfaces** following modern web standards and best practices
- Built CMS-driven websites compiled via **Node/Grunt workflows** into static HTML deployments suitable for AWS and database-free hosting environments
- Implemented highly responsive and interactive UI components using AngularJS and various JavaScript frameworks
- Contributed to both **frontend and backend development** across multiple enterprise and client-facing projects
- Developed hybrid mobile applications using **AngularJS and PhoneGap** for Android and iOS platforms
- Built internal enterprise tools including time tracking and project management systems
- Prototyped marketing and campaign management tools for large-scale social media platforms
- Delivered UI theming, redesigns, and feature enhancements for media, education, and enterprise platforms

EDUCATION

B.S. Computer Science - AMA Computer University | 1996 - 2002
